1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-12 rejected under 35 U.S.C. 103(a) as being unpatentable over Takano in view of Frank, et al. As previously discussed, the contact structure of Takano comprises a conductive blade 5 with a non-circular fastening section

6. As seen in the figures, the fastening section has two zones (one that has vertical sides and one that has angles sides) resulting in a chamfered angle therebetween. Takano lacks a "saw shape" cross section that increases contact between the parts. However, Frank teaches a similar contact structure that includes a saw shaped cross section (Fig. 1B). This is formed by inserting the saw shaped insert and punching out a corresponding slug from the strip (column 5, lines 50-52). The result is a saw shaped fastening section for the blade 1 which inherently increases the contact area. In addition, Frank states that this is done to "provide more intimate contact" between the parts (column 4, lines 1-3). For the same reason, it would have been obvious to use a saw shape connection on the blade of Takano.

As previously noted and not argued by applicant, in regard to the method of claims 2 and 4-12, the "determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process" (MPEP 2113).

3. Applicant's amendment necessitated the new grounds of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL.**

Art Unit: 2833

See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
